

ENUMCLAW SCHOOL DISTRICT TECHNOLOGY PROGRAM REVIEW

STUDENT SURVEY COMMENTS

- Is there a way to access our student profiles from home to work on assignments?
- There are computers in my school, but many do not have internet on them. I go to Kibler. If I want to research something, I wait until I am home because most computers at school aren't connected to the internet. The library computers are and one of my teacher's computers is, but the other computer in the class is not connected to the internet.
- i thnk this survey is very usefull to students
- i wish to do: type to learn in the classroom
- i wish we could have more technology
- I wish we could go to this in our classroom moor.
- i wish we cood have more tacnoligy
- I would like it if more technology was used in the classrooms.
- uhh yeah i dont know.
- i belive that we need to involve computer tecnology into everyday life all the way down to emementary school because it would prohibit ferther and easyer learning
- this was a short survey!!!!!!
- this was boring
- technology is good to a point... i agree until you make it impossible to do something..
- i think there should be more on the computer for learning. sometimes a book is better but a computer can be very helpful.
- Why is this so boring???
- what is the interigol word what is impemented?
- english please
- i strongly agree
- You have put blocks on every web page on the internet! How am I supposed to research the war if violence" doesn't let me see the website! We are mature, we can handel more than you give us credit for"
- this was a good survey

- it was gorgeous.
- no comment....
- This survey was very confusing it was hard to understand
- This survey was confusing. I didn't know what half of the words meant.
- english please
- i think there should of been a choice between agree and disagree like so so or kinda
=[
- The school district has managed to produce an environment that is safe, but the level of security is so high that the environment has become so limited it ceases to be practical and easy to use.
- The level of safe computing in the school district is soo high that it is starting to limit productivity of students. This should be fixed!!!
- I disagree with the blocked sites.I think that we should be able to go on what we want.Maybe only certain ages should be allowed on,such as the 8th grade to 12th.Also if you want to go on these certain sites you have to use your number...
- i disagree with the blocked sites because some of the sites are not bad.
- Hi!!!!!!!!!! :) :) :) :) :) :) :) :) :) :) I'm HAPPY!!!!!!!!!! :) :) :) :)
- Some questions are to hard
- i think that the techology is fine here at school
- i love technology i would like more time on the computer to go on a freething where we have time to go on anything we like.
- it would be nice to have more technology at the computer lab. But i guess that it isnt really nessasery.
- more teachkolgy in the classes.
- we dont really get to go on the eneternet/computer.
- I THINK THAT OUR SCHOOL HAS VERY SAVE ENVIERMENT BEACAUSE WE ARE NOT ALLOWED TO VEIW ANY THING THAT HAS VIOLENCE AND VERY INSECURE THINGS.
- I feel good about our technolgy that we have but i think we could use more technoligy.
- I would like it beter if we had like time to do what ever we wanted like google something.
- the way i feel about technology is i think we dont need any more.
- I think it's fin waer it is because if we have to mach tecnoligey we mit not remember how to write when some kind of tecnoligey brace.

- i feel that we have enough elmos just not enough of any thing else
- hi yo yo yo
- MORE TECNO!!!
- i think that personal laptops would be great because there's alot of students who have no computer and it would help everyone out.
- let us go on myspace please.
- mr miller is cool
- i want to be able to check myspace and facebook.
- There is way to many blocks on web sights!
- even if you guys block myspace, many students still find out how to get onto myspace and stuff. like yesterday.
- give each student a laptop in the library. And there asre too many blocked web sites.
- GIVE US MYSPACE!!
- i feel like all students should be able to have lap tops in each room! we should be able to use email too
- Please let us have the websites that you block. Some of them you block are the ones we need for gathering information. Unblock every wibsite you blocked.
- let us have myspace and e-mail at school. mr. miller is the best
- Though we are able to use computers it is often difficult to find informantion dur to the repeated pop-up of ACCESS DENIED (PORN) when im trying to get to science sites. there is also problems when accessing other sites. we should also be able to have email access.
- there is to many blocks on a lot of websites. not only on sites that are deemed "Inappropriate" but on the sites that are good. it is so hard to do research on computers if the site has a video it is automaticly blocked. that puts a limit on what i can use. also i think that you should you differnt standards cause stupid stuff gets blocked."
- i think it would be a grate idea because we as students need to be able to use sertin sites for sertin projects and to be able to use our own sites for our personal setingings when ever we want.
- I agree that the enumclaw school district has a good way for students to learn about technology.
- cool
- the school website is terrible, we need specific athletic services
- This was stupid!!!
- You can't block everything on the internet

- honestly
- Blah
- ?
- more computers in each classroom. noto as much blocked stuff that is not bad. it takes away from learning
- Most websites are blocked and they arent bad and they are good sites for researching. We need more computers in each classroom. We need heating and airconditioning. We need to be payed to go to school. everyday should be a late arrival. The computers are old and we need more new ones in all class rooms. School is to strict. and boring we need to make it more fun.
- we need to be able to go onto any game website because sometimes we have nothing to do and it gets really boring. I hate it that we cannot play games, even the ones that do not display violence. I gaurantee that if you talk to any student they will agree with me when i say that we should be able to go to youtube and myspace.""
- i want myspace. it helps me to learn at school.
- i think the school shoud allow more web pages then we have.
- i want to be able to access things that might be blocked but are important to my learning
- I believe that students should have access to almost every website. i also believe students should have access to be able to check their mail. i think students should have myspace but are only aloud a certain amount of time per day.
- the school needs a new principal. and new laptops and a cheerleader to follow every guy.
- i think that we should all be able to have un-restricted access to everything.
- I think that the school may be to strick on the Blocking. I think they should loosen it up a little and perhaps give each student one chance before they get the Extreme" blocking. I believe getting a laptop would be pretty cool, but perhaps a little unnecessary."
- the drum line needs all new equipment and better looking color guard girls
- We have access to many sites but alot of the online sites are blocked to our viewing and it seems to me like many should't be blocked. We should have access to sites we could use. We should have more chances to use computers maybe even every student have their own lap top. It would make doing work a lot faster and more correctly and neatly.
- we should get at leats on lap top for every student so signing up for school events and finding out information about the school will be much more easier and efficient.
- We have access to many sites but alot of the online sites are blocked to our viewing and it seems to me like many should't be blocked. We should have access to sites we

could use. We should have more chances to use computers maybe even every student have their own lap top. It would make doing work a lot faster and more correctly and neatly.

- i think every student should get there own lap top. and we should be able to get away with more things because we dont get any fun at this schooooool.
- as to question #8 i feel that they have implemented it too much. i can not find the information that i need for some classes. in Belvue every student gets a laptop. i believe that that would be a very good idea. acessing things i need are very difficult. i cant even check my email without geting in trouble if i can check it at all. its ridiculous.
- While the intentions of the district are good and well, they also are often too strong. Privleges such as E-Mail and Certain blog websites should be allowed. E-mail would not only make it for easier to transfer info from student to student and teacher to teacher.
- The technology at our school is indeed incredibly helpful but I believe that a lot of the restrictions are unnecessary. We are high school students and can handle more websites maturely. I admit some may not but why should students who need more information for schoolwork suffer for it?
- we should have lap tops in class and use it like a notebook and let it be ours for some people that don't have access to a computer at home. we should actually be able to check our e-mails in school because sometimes we students get some stuff from our teachersm through e-mail and we can't get it at school because we can't get to our e-mails. please let us take our laptops home and have them and be ours
- The school district computer, and websites, some of the websites that are needed for school work are blocked. i believe that we should not have any blocked sites, but if some student looks at the inappropriate crap, then we should block the sites from that student, not the wole school.
- I disagree on most of theses questions because i personally think that we should not have firewall because i mean ya we can go home, and check our e-mail and everything, but somtimes we would like to be able to have e-mail access at school. When we are in the computyer lab we need to go to google and most of the sites that have the best information have been firewalled, and so we cant get to the information.
- [REDACTED] We need to lose lightspeed"! Cell phones should be aloud for tools such as calculator and notepad. Email access should be available at our library."
- This survey is boring!!!
- Need to relax the blocking of the websites. Sometimes I try to look for information and it is blocked. Try not to block as many as there are!
- This survay was slightly confusing.
- too many big words
- Good job team!

- when ever I try to find information. I can't find all I need cause alot of it is restricted.
- I fell as though we need better overhead projector thingy's :D
- hello. :]
- They offer it but a lot of times they wont let us use it. School needs some macs.
- I don't like all the computer blocks. It a lot of the time blocks important sites needed for students to do research. Our school should also have typing classes for students who are slow at typing.
- I think you should give us a little more freedom. You shouldn't security everything. On multiple occasions, I tried to do legimate things like use a flashdrive to bring my assignment home. It didn't let me because I needed adminstrative priveleges. You should lay off the security on certain things that don't need to be blocked or give certain students specials rights that don't do anything wrong.
- FASTER COMPUTERS
- none
- :) I love school!
- i want a laptop
- use smaller words
- use smaller words
- I would like to see more computer use and more elmo" document cameras"
- computer in lab are way to slow, need to be upgraded
- to many areas are blocked
- We need faster computers in the computer lab
- coputers are very slow and shoud be updated !!!!!!!!!!!!!
- put myspace on computers
- computers are to slow!! and they need to be faster!! :]
- [REDACTED]
- the computer is really slow!
- Computers are extremely slow would be nice if they were faster. On school computer it is hard to get to some sites because they are blocked and they shouldn't be blocked
- computers are really slow
- the school web site does not help at all
- the school web site does not help at all
- we need more compoters at school that are new ... the old one strly need to be up graded.

- Computes are Fun
- aslbgaeiof
- all the apple computers in the school are vary bad the hp's are ok
- mr. reel need better computers in his room!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
- get rid of all apple and mac coumputers and change them out for windows xp
- We need new computers!!!!!!!!!!!!!!
- reel needs new computers in his class room.....
- the apples or the imacs in the school suck
- some of these questions i dont understand.
- i think we should be able to have some websites that we dont have
- i think that since we have computers then we should be able to have computers with us instead of have tyo write everything down, because it would be way easier than doing that and if we had a computer we could get information while doing our work better and better.
- i dont really understand some of the words in this selection
- THEY BLOCK THINGS THAT OU MIGHT NEED. LIKE LINKS THAT WE NEED FROM A WEBSITE THAT THE COMPUTER WILL NOT LET YOU GET TO.
- i dont understand most of the questions in this thing
- what ever
- Too many big words I didn't know/understand in this.
- There are somethings that i have a hard time finging such as important activities, but thought than that i can pertty much find everything that i need.
- no comment
- idk
- I FEEL THAT WE SHOULD HAVE MORE AND MORE TECHNOLOGY ADDED TO OUR OWN CURRICULUMS BECAUSE OUR FUTURE WITH TECHNOLOGY IS GROWING EVERY YEAR. USING THE COMPUTER FOR TESTS AND AS OUR TEXTBOOKS WOULD BE EVEN MORE USEFUL FOR OUR LEARNING. TECHNOLOGY IS INCEASING IN IS COMPLEXITY SO HAVING LESSONS ON HOW WE CAN MAKE IT EVEN MORE AND MORE LESS HARDER TO UNDERSTAND WOULD BE ABLE TO EXPAND OUR LEARNING AND GIVE US BETTER VARIETIES OF JOBS IN THE FUTURE. THANK YOU
- no comment.
- not applicable

- What is up with Skyward? Since when has the points of an assignment, tests, and other things determine the final grade of a student? Should not the teacher who is with the student the most be able to determine his or her grade? Effort should be the variable, not percentages of a person's grade.
- does this survey have an impact on our learning in school?
- This survey was pointless
- I do all my research at home because the school computers block everything
- we need to get rid of our macs
- the lightspeed is not a good idea, it blocks too much and makes searching the internet very difficult because almost everything is always blocked.
- i think the lightspeed system that the district uses is not very useful. a lot of the time it blocks out websites that students could use and it also blocks out teachers from certain sites that they may need.
- We need a bowling team and a powderpuff squad. Further more the blockage of some web sites is very unnecessary. Also food should be aloud in classes.
- this is a dumb survey
- I really like family access. It is a great way to check your grades and your attendance and lunch account. Also i like enumclaws website so that i can look at the calender and know what is going on.
- i believe we need myspace at school. Further more i strongly disagree with the no food or drink policies in the high school we are grown adults and should be treated as such most jobs allow food during work time cheaya peace out my homies from the westside kle dogg
- Im sorry I dont know what most of those mean! LOL
- i didn' get this at all you sould probly make it easyier to understand□
- too many non-understandable words
- I really only use this website for family access, so usually i don't come on it.
- computers are good to use at school
- For some students words (on this survey) are hard to pronounce or understand. Otherwise, good survey. :)
- I feel as if when you are trying to further your research, you can't get onto some of the websites, limiting your search to websites that might not have the things you need. And then when you are trying to fine something and you see that the website is restricted, then you have to go through the trouble of finding another website that actually has what you are looking for. So sometimes you have to do some of your reseach at home, and that limits some people because they do not have internet access.

- Have someone redo the high school page. Maybe some programmers, not people with dreamweaver.
- we are not able to visit enough sites because so many are blocked like if we need to find stuff on our african countries it is not fair. I think the survey is a good way to see how people think about what they do in the district.
- get new computer
- this website really sucks
- chea
- All done
- it all works for me
- oh yeah
- We could be using so much more to file things on computers. Plus the district blocks a lot of websites that aren't inappropriate and could be used for research.
- Get more computers, pcs and macs. Also we need more photography/video editing classes software and equipment/gear. That is where i could truely see the money used for electronics to be spent. Thank You very much
- Would like access to more websites instead of all the restrictions.
- The technology at school is pathetic...
- The technology is good but the internet is rendered pretty useless when they put such strong filtres on it. There are a lot of sites and images they block that are very useful and helpful to the learning process.
- i have no computer at home and i think not everything has to be done by computer because like me not everyone has all around access to computers so i think people should be able to do things by poster boards
- i dont like it when im trying to look things up on the internet, and the sights are all blocked
- we should be able to use the computers more instead of just book work. I believe that if we use the computers more we will better access to our homework if we are sick or miss a school day
- it is very nice outside
- I think that the the information is not entirely sufficient, and that finding information could be easier. Things need to be updated daily or ASAP, and things could be more explanatory. Unless you already know the things put on the website, some of the information is entirely useless. The website should be more effecient, in all aspects.
- #NAME?
- get rid of the forum blocks some of the best learning comes from disscusion

- [REDACTED]
- this is lame
- i think its too safe. Its hard to do research at school because some websites are blocked.
- yay ehs!
- I feel that the internet should not be filtered because there are many sites that are not bad and we need them in order to get the info we need for our research, but we can't because they are blocked.
- hello how is your day? poop
- eliminate profolio not every one goes to collage
- I can't understand some of the questions.
- I think that we need a laptop in our classrooms.
- u should make your survey longer and i
- I think you should make these questions easier...alot easier!!!
- we need more technology at ems
- i think you should make these questions easier!!!!
- i think we need to take some websites off of the blocked list, and get more computers in individual classrooms instead of fighting over who gets the library
- I think you should make these questions easier..i only got a few of the questions.
- i didnt understand really any of this
- I think the should put computers in the class rooms.
- I think that everyone should have a computer of their own.
- ummm...Ok if we all had laptops that the school we would be able to use those and it would be easier cause we have only 2 comp. labs and we have to wait a long time to use the comp. labs.
- I did not understand what they were trying to ask on most of the questions.
- i think that the school district is doing a good job so far. we should get more/new computers in every class.
- we should have more technology and teachers should have laptops
- we should have better technology and bigger classrooms and teachers should have laptops, it would be easier to teach and more kids would get AAAAAAAAAAAAA
- i think you should make these questions easier so i can get it and actually answer these questions to where i understand it. i think we should have more free time in school!!!

- i think on this survey they need to make the questions easier for a middle school student. they need to not have so many restricted access because u can probably get through them. they need to have more/computers in class rooms. i think we should have MORE free" time at school, to talk to friends, and not do class work. :) "
- blash blah blep bloop bloppaleepop
- dont put so much restrictions on the interner=t... too many sites are blocked and i cant find all information i need for projects... UNLOCK CRAIGSLIST.COM
- Pretty Straight Forward
- I think that students should be allowed more freedom on the computers. Some sites can be very important learning tools.
- there should be more interesting question it was kinda boring it wasnt fun at all make better questions
- No idea what this is talking about
- to much stuff is blocked to do most projects you cant even see most pics
- Too many things are blocked, so we should have a way to get certain cites unblocked like through an appeal process. MAKE IT HAPPEN PEOPLE!
- the district should come up with more specific rules for computer AND online use
- school should take off some filters...email is good!:))
- I think that certain things should not be blocked. Like i was looking up pictures of tattoos ans how they do them for a project that i had and most of the pictures were blocked.
- it was pretty cool i guess i mean im trying to learn stuff...thats bout it. cya l;ater
- you guys have alot of work to do on technolgy.
- its all good
- I think they need to not block so many sites on the internet. It makes it harder to research material.
- A large amount of these questions don't pertain to me as a student. Technology should not be the dominator or our learning experience and I an dissatisfied with the pressure that is placed upon students to use computers rather than their own creativity.
- Get ride of lightspeed
- i like hands on things...get more...
- i think the internet filter is a little out of control. even teachers feel that they should be able to access certain site the filter blocks.
- The Internet filter at school is too strong. We can't get into half the sites we need to access for research and things.

- There are too many blocked websites. You cant find the information you need all the time.
- get rid of light speed getting information is like trying to find osama its impossible
- GET RID OF LIGHT SPEED, BLOCKS SITES THAT COULD BE USED FOR LEARNING
- i think the district needs to allow addictinggames.com. the things i would do if you would just allow it.
- I feel the district has implemented and uses safe computing practices with students." Nice loaded question, if I say no you make it worse. If I say yes, you may think you have done good works for your students. "
- cant research anything because everything is blocked
- technolgy is stupid its to hard to work with and its faster and easier to just use paper and the internet blocks on the internet are stupid you cant even use it for research hardly i also hate are cummulative projects because im not going to colledge so the whole things a waste of my time aand im learning nothing that will help me in life.
- I think the school needs to take off like every block on the computer because you cant find anything or research anything on the internet because people are retarded and freak out about half the stuff on the internet. The way we have it now is pretty much pointless and we would be better off with no internet.
- Enumclaw high needs to not block and filter to many things. this makes it very difficult for e to complete assignments.
- All that i want to know is when school became ONLY responsiblity. All of my classes do NOT grade on the subject they are supposed to be teaching; they only grade on responsiblity. Only self-discipline. Home isnt there for us to learn the subject, but to be busy work. 5 classes of learning to do busy work.
- let us use the internet. we cant go to any sites.
- I think we need to do the grant where we all get lab tops! It seems to be very helpful in other school districts
- BLah 2 many websites are blocked. cant find any information i need
- Mac's fail.....PC's FOREVER
- the computers block to many websites
- what was the point of this????
- i beleive the school should get better computers and classes that are more computer based than what we have
- We should be able to go to any websight we want to when we are at school.We are in high school and we have the responsability to look up thing on the internet.....DHS needs more tec.

school appropriate" you can't find the information that you need because it is blocked!!"

- we need to be able to use the computer more for our school uses
- i dont think our input really counts you guys just put it here to make us feel better oh well
- i think that kids should be able to go on to web sites such as myspace or mail places because i think that we are old enough to make our own decisions about whats wrong and whats not
- ok
- we should have more access to different websites on the computers i think we should still be monitored but have more access to different websites. i think that would be nice. to many websites our blocked when we need to see them for school purposes like papers and what not so i think you should unblock them.
- I feel that is not right to block alot of the sites on the computer. There are alot of things you can explore on the computer and they have blocked the sites which is very unfair. We need to have freedom on the computer because all the sites are blocked and on our free time like myspace, Or craigs list its unfair its really like they dont trust us and they think were dumb and we will do something stupid. We are old enough to know what is right or wrong. when they block the sites what if we need them and its blocked and its for a project do you want us to fail i dont think so i mean i dont want to. On the sites about sex, or drugs i mean its just a site and we hear or read about it in school why not on the computer i mean come on were not kids so treat us like adults. We should be able to explore with out all the stupid blockings on sites. There are all a whole bunch of sites blocked that are not good. So i mean come on are we adults yes we are so treat us like one. You want to be treated that way so please treat us like them. I just dislike the sites that arent even bad. But they just dont like the fact that we look at them in school its not disrupting our learning we just have free time when we are finished with assignments so please take this in consideration please unblock some sites teenagers would use.. Thank you
- hello, im here to to inform you that i dont like how the school blocks every single web site. i mean if im doing a project on drugs or alcohol or even sex, if i need to research a topic the school blocks everything. well it doesnt help the process of in school learning. if you come to the library to do research on a certain topic you should be able to get the information that you need, and not worry about running into a blocked website. it gets really frustrating. in conclusion this is how i feel about our schools technology. so im asking you guys, try to unblock some things. were in High school cause we have earned it. so treat us like adults, unless we lose the privilege. If people on the school board think that were going to miss use the computers they should at least give us a chance, and if we lose that privilege thats different. but please give us kids a chance. that is all were asking. its not that hard is it? some times adults have no consideration of kids these days. they just think that were not responsible. but really we do it because the adults treat us like were 2. we are old enough to know what is right and wrong. we should earn the responsibility to do

research on the topics we pick, and not be block from something we want to learn about. were here to learn about certain topics. and we want to do it at school. that is why we have projects, there not always take home and do everything at home projects. you got to give us kids a chance to prove that we are all not the same. i mean dont get me wrong there are some kids that will abuse the right to look up what ever you want..but then again i will garentee that there are more kids that would like to get there stuff done at school instead of at home. we like free time too!!!

- i think that the school shouldnt block so many sites. Some of them not even bad at all. I can understand someof the ones that are inappropriate to look at. But come on if you search for a picture or information on a topic for school you shouldnt have to try another site just because the one you clicked on popped up with a thing that says can not open. It has happend to me many of times and it takes alot longer to search things that you need to. I think that high school students should have special access to things like games and myspace without them being blocked. We know right from wrong. I mean come on i can understand middle school and elementary schools have real limited access. But high sschoolers should not people think that we should be responsible but how come we get pop ups that say we can not enter the website. this is my opinion thatnks.
- nice survey
- will you please bring back the website to craigslist. we miss that and we dont have anything else that isnt blocked so that was the only one we could look at. Thank you and I hope you will take this into consideration.
- cant look at needed sites on the web
- We can't view everything we need to be able to for our projects.
- please unblock venusarcade.com, thank you for your consideration
- please unlock venusarcade.com,craigslist please thank you.
- best comment ever!!
- Computers are too-efficient. They create a progressively more lazy humanity. Computers are the devil.
- get rid of apple computers
- i think if they are going to do anything with technology they need to not block web sites because when i got online at school and look up something for reserch a lot of the times its blocked and that makes it hard to look up information. expecially if you dont have a computer at home.
- the school is too restricted, i put a lock on my jump drive not long ago so if someone were to steal it they could not use it - i had to turn it in late because the restrictions wouldnt let me print off my page
- The access of internet here sucks. I get so angry that everything is blocked. I promise you I am not attempting to look at Porn. Thank buddha you unblocked wikipedia.

- though our technology is sufficient because of our rather overly protective web monitor certain classes become very difficult to complete things for at school. if i did not have a computer at home i would never be able to complete any kind of assignment at our school.
- I think that most of the blocks on school computers are to extreme and make it much more difficult to complete projects and homework. For example unable to use rick click is a pain. Also the blocking of websites sucks. I think that websites should individually be blocked like myspace or porn. But things like email are important to send yourself homework or projects you are working on. At least the distict should supply each student with a school email address that they could access from their house computer. I think it would be beneficial if the school supplied each student with a laptop to take notes on, use as a textbook, and on homework. I know there are details to all of that, but they can worked out. It is just as economical as replacing textbooks, paper, and so on.
- every student should get lent a laptop for the year
- we need faster better computers and more access to websites on the internet
- I think that even though we are aloud to get online at school they dont let us go to enough places because they block every website
- i like purple elfants on tuesdays sometimes they smell funny like fishsticks burning
- Not like anyone at enumclaw school district cares
- The site blcker for the internet needs o be alot less strict and allow more sites to be viewed. Alot of good info is blocked becuase of it.
- grades grind my gears u could be a good kid but jus suck at school so thats what grinds my gears
- we need labtops
- we need laptops and ipods also food and drinks in class
- i think that if with the teachers promission i think we should be able to access some websites that are band but that are not inaporpite like if a student is done with work and wants to go on line on a site that is banded but is not like pron or any thing like that but like gaiaonline or myspace but only with teachers promission and/or reacattion i think they should be able to go on and be a repsonable adulte and not do any thing stupid thats what i think
- I believe that our school is to strict on the internet and that we should have more freedom than we have and the kids that abuse that freedom they should be punished not the rest of us from sometimes things that we need. Also i think that we need LABTOPS. Badly!
- i don't look for stuff on the distric website.
- I think some of the computers at ems need to be replaced.

- Overall am very satisfied with the availability of technology in the schools and wholly agree with the precautionary measures established to prevent wrongdoings on the computers- my main request would be that the actual teachers whose classrooms possess an abundance of computers or whose curriculums are largely technology based take on a more active role in monitoring student computer activity and adopt a stricter disciplinary policy towards pupils who abuse the privilege to have access to such technology. One of my parents is currently working on my district's technology team and has expressively stated that there are few additional measures of prevention available for implementation. It is the teachers who have the ability to personally monitor a student's technology related activities on a daily basis, investigate questionable situations as they perceive them to be occurring, and quickly correct the matter if an issue is discovered. It is my hope that the greater the level of interaction between the educators and the students utilizing the computers, the less misbehavior involving technology will occur in class.
- Some classrooms at school have 10 computers, while others have none. More computers should be added to each classroom to let students have an equal opportunity to use them.
- I think they should block less sites
- I felt that the survey needed more questions about the computers at the schools.
- the school needs to use computers more in everyday lessons.
- I think we need to be able to access email at school. one reason for this is so we would not have to save the project worked on at school onto our email, and that way we could also work on that same project at home.
- I'm not always able to find out certain information on the school website. It needs to be easier.
- let us use personal email addresses such as Hotmail. com!
- I think if we get new computers they should be apple computers because they are easier to use and have better software.
- I wish that some of the computers here at the high school were faster.
- Sometimes I'm not able to find some things that I might need for the project that I'm doing at that time.
- I think that the firewall is too strict and makes finding information difficult. Also at the computer lab the computers tend to be very slow. I am not sure if it is because of the large amount of people all trying to connect at once or if it's for other reasons. I think that being in high school we should be trusted enough to send ourselves email. It's an efficient way, through an attachment, to take work home.
- I think that the firewall protection is too much, because sometimes I can't get on a web site I need to for school or project. I also think the students should be able to access the email system because high school students are mature enough to take care of themselves.

- the schools internet fire wall is too strict and it mekes it hard to do research on certain topics from school computers!!!!!!!!!!!! we should be avle to acess email accounts from the school computers so that we can email projects and information to ourselves and be able to open it at home and school so that we dont have to carry around a disc drive !!!!!!! thanks dudes!!!!!! oh and the computer lab computers seem to be very slow im sure it has something to do with the amount of students logging on to the compters
- I think that the fire wall is to strict, it is hard to look up some topics.
- it is cool
-
- I think we should have a little more websites for kids to go on and learn lots more no efense to anyone.
- i do not like this
- i do not like this
- The school blocks way to many websites even sometimes when I'm researching for a project and looking for information it won't let me go on a site because it's blocked. I think the school should give the students a little more freedom on the internet and trust that were not going to do anything were not supposed to do.
- i think that we as studenmts should have the right to check our emails at school so that we can do our homework at school and send it to our email so that we can continue it at home. I think our learning at school could be extended by allowing us to go onto craigslist.com, yahoo, aol, ect and other sites suc as youtube.
- I feel that we should be allowed to visit websites such as AOL, Yahoo, MSN and so forth to access our mail. Alos, websites like craigslist should be allowed becasue tehre is really nothing bad on them. Also, alot of sites that may help us with projects are blocked and i dont feel they should be.
- i would like to have less restrictions on the computers..cause when im looking for pictures i might need. they are always restricted and i cant get them. also we dont get enough computer time in any classes.
- i think i should be able to download pictures of my brother baby john from school because thier on my email.
- wikepedia free encyclopedia is blocked and it shouldn't be its a great tool and alot of kids use at home but then at school it's blocked and it's a great incovienence.
- 
- i have the idea of letting stunds access they email. we can use the email to send our home work to school. we most of the time lose our jump drive. the cds are a hassle. this would be much easier. thank you

- Most sites are blocked and should be unblocked because most are useful and have no reason to be. Also, We should be able to reach our email because most people don't have the time/money to go out and buy a jump drive. With this you'll be able to send homework/reports to yourself and print at home. Thank you.
- Most sites should be unblocked. A lot have information, but we cannot access it because the site is blocked. We should be able to get to our email, because we get forwarded messages from teachers/classmates, and some kids cannot afford/remember a jump drive where as your work stays in the email.
- We should be able to access our email from the school computers so that we can send our essays to ourselves. Not everyone has a jump drive and the floppy disks are not reliable and they are out of date. If we can email then we can have access to our essays anywhere and have more places to work on it.
- we should be able to get on our E-mails so we can do our homework at home so we can work on it there because no one these days has floppy disks.
- It's hard to do work at school without being able to send it to your computer so you can also work on your project at home. floppy disk and disc drives are unavailable to some students and pricey. being able to e-mail your work to your computer so you can also work on your project at home would be very helpful to most students. email should not be blocked it's a successful fast way to save your work and still be able to work on it at home. i understand why it's blocked but it would be nice if it wasn't esp to the kids who could really use it for good uses. i'd actually be able to work on my homework at school while also knowing i can access it at home too, in conclusion we need e-mail. thank you.
- I feel that we as students should be able to access our email here at school for school related purposes. Also I feel that websites shouldn't be blocked unless they are extremely inappropriate. I believe that if a student abuses the privilege of the internet they should get the websites blocked, not everybody. I have a hard time finding everything I need for school projects using the school computers because so many sites are blocked. As you can see I have strong feelings about this subject and I thank you for taking the time to read this.
- i think that we as students should be able to access our email because if we do a project here at school on the computer we cannot continue the project at home and that can damage our grade if we do not have a jump drive and floppy disks are out of date. some of the websites that the district has blocked do not need to be blocked like gregs list for instance because gregs list doesn't have any inappropriate material on it is a site for buying and selling merchandise on the internet like furniture and cars. the way to buy lunch is too slow with having to type your number so it holds up the line so i suggest that we make it in to like a credit card swip so that it goes faster
- you are cool
- this is weird. hi bye
- I think that we have good technology but we really need more com

- i think our technology is good i think we need more elmos compters ect. and more use for more students to use digital cameras for ll students to make yearbooks ==-)
- i think there should be websites like youtube and skatewarehouse,addicting games.com
- i think we need elmo technology hi is my favorit word
- i think the school should open up website like websites to go toy our mail and things like that
- while i understand that the school district needs to restrict certain websites, i think they need to rethink the ones that they do block because kids who dont have computers at home, need to be able to get their assignments done on time and not have to worry about not getting it done because they cant get to certain websites... and also, i think its a bit ridiculous that you can get on to websites that have to do with Martin Luther King Jr.'s speeches.
- the computers are slow and they block sites they shouldnt. For example i was looking up pictures for a project and it blocked all the sites leading to the pictures.
- i don't like how some imporant websites are blocked and they could really help with the school work.
- we cant get into several good websites such as wikipedia and clipart.com that i pesonally use for alot of my assignments the more you block the more worthless the system gets and irritating because theres nothing to do on the internet
- i believe that there is way to many restricted sites and sometimes i cant find everything that im looking for and i see when i search for it that it will have it in that site but it wont let me go into because of the restrictions
- i think that there are a few sites that should be unblocked due to the use i need them for
- I understand why some sites are blocked but some of them you cas't get on and their not even bad at all. So it stops you from getting imformation you need. I don't think we shluld have all the sites not blocked but not so many, and some of the pictures on google don't even need to be blocked. I think high schoolers are mature enough to see two people kissing or something or see a cuss word and not freak out about it. The same with movies. How we can't watch movies that are rated R. We're in high school. I'm sure almost all of us have seen one, and we're not that immature.
- well theres not much to sat i just with that the school had more computers so more students could use them....it would be cool if we could be able to log on to myspace.. just kiding lol:]
- i think that some websites should be unblocked. perhaps a permission slip (so to speak) could be implimented at the beggining of the year that our parents sign saying we're allowed to use certain websites. unblock them on certain peoples accounts. i personally email a lot of my assignments in to my teachers, and sometimes they dont completely send. so if i were able to access my email from a school computer, than i

could re-send the assignment in. also things such as myspace or facebook should be unblocked. i think if we have freetime, we should be able to use it. if i forgot a certain assignment, like the problems we had to do on a math assignment (and that happens a lot) than i could get on my myspace and ask someone. it'd be a whole lot easier!

- I really don't like light speed blocker because I can never and I mean never get onto the site I'm looking for and it's really really annoying to know that you should fail because you don't have the information to pass your classes. Thank you for reading this comment.
- hello
- More sites need to be able to log onto please.
- never use much of what you are saying
- woop woop :]]]] yeahhhhhhhhhhhhh boiiiiiiiiiii
- we should be able to get on myspace,yahoo mail,and msn. because some people dont have computers at home also some people get on myspace to talk about school assignments
- i think we should be able to acces our home emails on the web at school.
- I think we should be able to have any email here so if our parents or someone tells us to check our email, we can, so itf it was important or something.
- EHS SHOULD ALLOW STUDENTS TO GET ON MYSPACE,ONLY UNDER THE CERCOMSTANCES THAT THEY HAVE FINISHED ALL THEIR SCHOOL WORK AND HAVE GOOD GRADES
- I think too many of the sites that arnt bad are restricted
- i think that we should have access to our email and myspace.i say myspace because it's just like email.plus, kids may not have access to it at home.and you shouldnt block so many websites.
- The filter is too secured for us being properly able to research topics given to us.
- I think that we should have computers in each class at least enough computers for the biggest class in that room and if that is not possible then each person should be assigned a portable computer at the start of the school year.
- None
- I was hardly able to answe these
- Get new drinking fountains because the water is gross
- this is a good survey thank u
- I think it's a good idea for the students not being allowed to get onto inappropriate websites during school. We are here to learn.
- i could hardly evan understand the quesions they were asking.
- I am very happy with the school

- needs faster internet
- you could allow use to access e mail it is a whole lot easier than carrying many jump drives
- Needs to have faster computers,internet
- i strongly believe that we are able to gain access to my email address because, it would be a positive benefit towards my learning,and would cut out having to carry around a jump drive all the time.
- it would really help me to be able to use my email so that i do not need to keep track of a jumpdrive i can just send it to my computer at home.
- I wish that we could have more freedom on the internet, so when we can do projects but some pages are blocked and its very frustrating get more computers i like dell
- i think that the school should let students have access to their e mail instead of taking the risk of bringing a jump drive to school and losing it that way the students can e mail work to their home then it would not be as much of a hassle.
- it would be alot easier for me to send myself a email so that i don't have to use a floppy disks. i should be able to get my email. it also would help if there was more computers in the class rooms. there are not enough
- we need more computers in the class room it gets really old having to go down to the library every time we need a computer in classthanks for the survey
- It would really help me to be able to use my email at school, so i dont have to bring a jump drive and to use it to get me my homework and projects and stuff for classes.
- I think that our school website really sucks. Because it doesn't give barely any information. They could put for information and it could be better thought out and more well equipped with things and dates for our school. Also having better computers that are FASTER for all of our classrooms. Because it takes a long time to get on the computer so we have a shorter time to do stuff. thanks! [:
- it would be alot easier if i could send an email to myself at home and not have to bring a floppy disk. It also would be easier if we had more computers in are classes and that are faster so i wouldnt have to come to the computer lab all the time.
- I wish we had are msn mail because I can't get a floppy and I need to bring my essays to school!
- i think we should be able to access our email to talk to our parents
- Technology is a very important part in our schools.
- Technology is a huge part of my education. I depend on the network of computers i have here in the school.
- The security thing blocks way to many websites that have valuable information. SO STOP.

- alot of the websites that we need use to research things are blocked so it is hard to research things at school. there are to many blocked websites with information.
- this school does not worry about if a student is failing they just go on and ndont care what happened to the no child left behind act
- If technology was better utilized in this school district then it would better prepare its students for life outside of school.
- we need all the computers we can get
- It is really hard to look up information when EVERYTHING is blocked pretty much. And also if you click on one thing and the district thinks that it is a bad thing and the freak out and hunt you down at school. It sucks big time and i dont like having sky net either. BASMATI is way better. The district spends more time worrying about what students are doing on the internet then anything else.
- I feel that the technology is somewhat effecient in this school but i do believe that it could be better. Some of the sites that are blocked on the intrenet are some what ridicolous and need to be over looked. There are alot of sites that at times would seem to provide me with helpful info but would end being blocked. I also think that if better technology was used to in our school it would better prepare our students for thier future
- Enumclaw High School is behind when it comes to technology. we need to do some catch up.
- I believe that the school needs to do more with its technology. While we may have computers I think that the district needs to do more about the amount of technology that is in the schools. If technology was better implemented into this school it would better prepare students for the technology that they will inevitably encounter in their jobs in the future.
- The availability of computer technology is minimal. I have access to a functioning computer in one class only. My greatest concern is with the over zealous blocking of various internet sites. When i am doing research I feel it is unfair not to allow me to visit sites for information simply because there is a forum, or because the site has information that relates to a video game. This overzealous blocking is bothersome in researching for my IA (which is about game design!). I also beleive that the technology in the class room is outdated.
- The technology in this school is definately lacking. With barely any computers for most student use, not to mention outdated software, and internet access that is both limited and hard to work with. If we want students to be able to suceed in and utilize technology, we need to give them better tools.
- I am part of adventure school, and i know that we have technology because the Teachers make the effort to get it. Without this technology, i wouldn't have opportunities to learn like i do. To invest in more technology is one of the best ideas that i've heard. But then again i have been hearing that for years and year

- Because it is so safe, a lot of information that we would need off of the internet is blocked from us.
- To many websites are blocked you can never find exactly what you need
- 8: Practices are safe, but often interfere with finding information.
- [REDACTED]
- Too many things are blocked on the school's internet. It's hard to look up facts, but images especially, when doing a report.
- Internet controls are too stringent.
- I don't use the school website very much, I have only used it to check family access.
- Although technology is integral to the teaching and learning environment" this is true...I believe that we, as students, should not be expected to rely on internet because some of those students do not have internet at home and have to use other resources which can be just as good as a substitute rather than the internet."
- there is too much blocking on the computers to the point that it is almost impossible to look up anything for research.
- It is a great help having good access to technology at school, it helps you prepare projects as well as search for information.
- I see that the district is trying to imply internet blocks on the web. This is something I am strongly against. I feel that it is an insult to us as students and it is a crime to out learning. I feel that we are responsible enough to use the internet correctly. I also think that is disgusting how technologically unadvanced our district is compared to others. We are in an age of advancement and technology and we are being held back by district policy and poor technological integration
- The equipment is sufficient, however the lightspeed blocker is often more a hindrance than an aid. Many sites that should not be blocked are, and some inappropriate sites slip through. I personally don't see the need for an internet block in a school setting when the school can monitor what sites we visit anyway. If a student looks at a pornographic site, he will be discovered.
- Technology has not improved the quality of student work. Students did just fine in the old days, with just a pen and paper. Having internet access has been made a requirement by some of the course work, but I do not believe that it has improved the quality of my education. I've used a typewriter, and it looks as good as a word-processed document. Access to technology is not a problem; focus on student achievement instead, because there is little correlation between the two.
- As far as Question 8, I feel that the district has taken the implementation of student computer safety to an extreme. I have found the right-click function to be necessary for any competent computer user to utilize the technology available in the classroom. In addition, I feel that sending in a request for the unblocking of a website through Lightspeed is discouraged by the district, and rarely, if ever used.

- Technology is not nearly as integral in education as it is heralded. Far more attention is paid to it than is necessary; this survey is testament. My education has been impacted positively by a few fantastic teachers, not by more spending per student on technology. Perhaps the district should focus on hiring better teachers and less on trying to be innovative with technology. The content filtering system is often too restrictive and renders the expensive technology rather useless. I am a member of the Newspaper staff, and inability to access email accounts for articles is cumbersome and frustrating. Perhaps if Lightspeed were more situation specific and had restrictions implemented based on the computer and not just blanket censorship, the problem of counterproductive restrictive access could be averted.
- 
- I think we should be able to access email accounts so that we as students can email our assignments done on computers and be able to access them at school. Also I think that youtube.com should be unblocked on Light Speed because it offers significant learning experiences and does not have anything suggestive on it.
- teachers need to update family access more often
- I think we should be able to have e-mail on here so I can send my homework to my house so I can work on it. Also I want more sites to be unblocked so it will be easier to do projects and research things.
- I think we should have e-mail on here so I can send my homework to my inbox and work on it at the public library. Also it will be helpful if not so many websites be blocked because we need them for research.
- Why?
- I think we should have email so that I can send my homework home.
- None
- I believe that the school should allow the use of e-mail, because many kids need to take something home, and don't have any sort of jump drive, or flash disk. Also, Teaching will use technology, but the teachers should try to make the kids use their heads, rather than hit some buttons. I also believe that the computers are too restrictive, the right click being disabled just doesn't make sense. Then again, it would take more time to disable the functions making a negative impact on the computers. I believe that certain sites should be allowed through, that Lightspeed blocks, I think you should just have a virus and spam and trojan filter, and let the kids do what they want, and if a teacher sees them doing something, they get in trouble, but waste their time doing it.
- I think it would help if we had more computers in each class
- I believe a lot of the sites that are blocked shouldn't be. It deprives us from certain information that we need.
- ohhhhhhhh yeaaaa

- it would be nice to have a few computers in each class to be able to look something up if you need to.
- I personally think we should have a different fire wall because students are blocked from some websites that genuinely don't need to be blocked. It is harder to see certain pictures we may need and it just makes things difficult.
- i think a few gaming websites should be able to be used in our libraries and maybe more sports websites seeing as i am a football player it should be applied to our computers.
- The few areas that i would change would be changing the fire wall, it blocks out from our learning when we need a picture it blocks out half of them. Makes it hard to learn. Also being able to e-mail at school should be allowed. Nothing like myspace and anything but other than that e-mail should be allowed. Thank you.
- I think email would be beneficial so I can upload powerpoints or word documents onto my email and download them to the district computers in case I don't have a working portable storage drive or printer at home.
- too many sites are blocked or parts of sites. it is really frustrating when i am trying to do/find something. please reconsider and see if everything you have blocked NEEDS to be blocked.
- i think we need faster computers because it sometimes takes a long time to find something
- We should be allowed to access our e-mails so we can e-mail projects home to work on and send them to us here at school.
- i like food
- the web restrictions are hindering my learning experience and the computers are WAY too slow
- Too many websites are blocked at school.
- i wish there weren't so many restriction on the school computers
- students should be able to access their email at school so they can email their assignments to teachers.
- the only problem i have with the school computer system is that if there is a blog or a game that blocks a goog website that has info but the one bad thing blocks every good info on the page
- we need to have more freedom on computers and we need to have freetime
- 
- ohhhh yea
- i dont like when i look at something on google and all the images are blocked when it has to do with school related subjects.

- I use my laptop for notes and labs in science, but I'm not allowed to use it to write essays or pull up assignments in english, german, or PNW. It's heavy to carry and if I only need it in one class than why would I bring it every day? It has most of my notes and I only bring it when I think I need it, but then I have to carry it around with no more use for it.
- need to allow right click. the copy, paste, and other functions are needed. need to fine tune restrictions, instead of just restricting every function
- Will someone let me know what this is for? The survey.
- too many big words
- hi
- this survey seemed very practical
- We need emailm, and better computers to help at school.
- i think some of the sites should be unblocked.
- Another computer or 2 in the classrooms will help library congestion.
- you guys block to many things and it makes it difficult for us to reaserch certain things
- i think that the district is a little to harsh on there safety on there web sites. i think we should have email so we can email our self information that we need. for instince, i needed a data sheet from the computer for my senior portfolio and i couldnt do it. school computers suck. there slow and theres not enough of them in classes. each class should atleast have 3 computers.
- The internet doesnt allow me to get onto websites that i need when it would be useful indormation.
- The schools technology program is appalling, especially the computers. The computers are out-dated, and only operate on a marginal level; working to slow and often times freeze up or give the blue screen of death. Also there are not enough computers, on average there is only one per class. Also, the web blocking is too strict. Legitimate websites are blocked all the time. Two recent incidents are when I was doing a report on Freudian theory, every website I went to was blocked do to sex. Also in physics, I tried to visit Remington's web to get ballistic info on a certain weight bullet, but it was also blocked due to violence. Really it is shit to work with.
- Why don't we have laptops
-
-
- i think we nee more computers in our classroom
- I think southwood has good technoligy.I think there shood be at least 5 computers in each class. School shood have more technoligy (if they can). Because it would be

easier to find stuff like books,lost clothes, and speicil pencils from home. i do a lot of stuff woth computers like games and email.

- I think Enumclaw school needs better, more updated technology. I hope that happens
- i think that this website is very helpful
- i think southwood is great at helping us use the computer and internet.The districs goals are to make good schools and good kids and get us smart.I think we have a great school distric in enumclaw.I think southwood is a great place to go to school and learn about all things and the teachers are great
- even thought i have not see the thing i do think probly that it is good for kids
- I think that the computers should be updated, these computers are old,here at southwood. Also,southwood needs different books! I like how southwoods library search is organized,it's easy,(a little)and fun!!! I've never been to alot of websites,but I have typed alot, I know how to do weird stuff S?} « ÑÑ¿ |°°pO■tv?■| ==≈σ■?Æ?
- I LIKE USEING THE COMPUTER BECASE I FEEL SAFE
- :)
- Technology is a give and take situation. The more access you let students have, the more they will use it, but the more power they have to get into trouble.
- i think southwood is great at helping us use the computer and internet.The districs goals are to make good schools and good kids and get us smart.I think we have a great school distric in enumclaw.I think southwood is a great place to go to school and learn about all things and the teachers are great and they teach us alot and are always really fun i love enumclaw schools everybody is really nice about everything everybody is really nice to each other its a great community to live in
- i can not agree with the last question because it is so vague. what is safe" computing? like lieterally? or is that the explanation for being denied access to almost every website i try to view for research reasons."
- I do not always find the school Supplies List at the begining of the year like 5 days before school starts. A lot of classes need more coumpeters and Elmos. Im glad how the school district cares about us and our teachers .Other wise the school district is great and I wish to stay in the Enumclaw School District. I think you are great and keep up the good work. Sincerly [REDACTED]
- sensoring is really strict and needs to be be changed. it wont usually let you look at normal and completely appropriate websites. If you have a project that needs to be done and you need picutres and dont have a computer at home you are out of luck becuase you can't find any pictures on the school computers.
- Ithink that somtimes when some kids want to go to another website they cant,that that we should be able to, not that we shoul be aloud to do all games but some.

- Referring to number eight i feel like its to safe and I cant even look at websites i need to use. Like sometimes a website with information i need is like a forum or something and it wont let me look at it and its EXTREMELY annoying. you should fix it thanks
- censoring is incredibly high you cant even search something in health or anatomy because none of the pictures will come up or any of the information because it is demmed inappropriate". I think that the district is more childish than students learning it for learning purposes. If you need pictures for any health related items you are out of luck. The district needs to look at the block list and review and make neccasary changes. "
- I do not feel we have adequate technology at school. The computers are all extremely slow and the cencoring on the websites makes it so even educational sites are blocked. I feel like a lot of the blocking is unnecessary we are mature high schoolers and we should be able to access most material on the internet unless it is extremely unacceptable. If teachers are worried about students looking at inapropriate sites maybe they should start monitoring students better and not putting responsible students at a disability because some children can't handle the internet.
- dont take my comment for #1 becuse ive never came to this website but, i am not aware of your goals to get more technoligy becasue, in my oppinion the is hardy enough computer to go around for even 50 students or so.Ipersonally think you should do more fundraisers and put the money into technolegy into the schools!!! its like whenever somone needs to go on there isnt any computers for our use!it is not far that somtimes were not even allowed to go on.... it is so very very stupid i hate that you cant do anything to fix this problem and to nothing for any of the schools!we need more techmolegy.
- There really are not enough computers at this school available for use. Whenever our class comes down to the library, there is always someone who does not have a computer to work with. This is particularly hindering when the project is an in class thing. I also want to bring up the amount of things that are blocked. There are times when I need to access a website or find a picture and the site is blocked to me. This is one of the most annoying features of the school system. I think that there is need for blocking of some sites, but the amount that are blocked now is a bit over the top.
- Though the district has tried to limit the amount of inappropriate material, they have also limited the necessary resources required for specialized classes, such as photography. because the server is so restrictive, necessary maens of communication are not allowed in the classroom.
- english please
- english please
- i belive they need to be able to have the student check e-mail/myspace at school
- well i would like to have comptter in every class becuse i like compters more then writing

- we dont need myspace or any thing like that but to get to your E MAIL would be nice to get projects from home to school.
- I think there should be more computer labs or computers open at all times
- i would probably like the website if i went on it alot.
- have more elmos in diffrent class rooms.
- i think we could use more coumuters at are school andprinters
- i tink taht we cude have more teme work
- I don't know if you need this but i have 3 computers at my house and i think Southwood has a safe inviorment.
- I like the elmo the over head thing. i wish the school had a big cumputer
- My teacher is a great teacher and I think that she has most of the things she needs, to be a wonderful teacher,and be sucesful in teaching us stuff we need to know. She already is!!!
- Have more Elmos in diffrent classrooms so classes don't have to share.
- They shouldn't block so many websites.
- i dont like computers at school
- =(-.-)=
- It blocks of so many pictures a websites that are ok. learning sites
- need to up date power point program because aome kids have newer program and it dosn't work.
- the computers are fine. its the internet that SUCKS!!! also we are responsible to be allowed to get on other sites as they may have the info needed but we cant get on them because your STUPID BLOCK!!!!
- I never ever use your little website thing because I just don't and this survey was pretty confusing I mean some of the words were hard to understand no joke.
- new computer and smart bords it helps lurning i came from a school with them and it helps and the e-mail thang is stupid i do home work at home and i send it to my e-mail and i can not get it here becuse of it you could make it so you have to get a pass from the teacher to get on your email kent dose that it is help full to get on email and if you dont unblock it you should suple flash sticks cuz ever one dose not have money for that and it is suppost to be a lurning in vierment and you can not do that with ever thing blocked
- mmmmm get new computers that are not mac hint hp computers
- get lap tops! no macs
- what do you spend the mouny that you get on
- Computers are to restricted to find info sometimes.

- i love that our school gives us the oppertunity to state what we think about the technology here.
- GO HUSKIES!!!!!!! STANFORD WILL FALL TO THE MIGHT OF THE DAWGS!!!
- our internet is WAY to restricted. i understand that we can get into trouble but it also makes simple searches very hard! even the teachers mention the level of difficulty of finding certain materials. [REDACTED]
- the computers are very useful and helpful to my learning
- I find skyward family access very helpful because I can check my grades on a daily basis and figure out what I need to improve on in my classes and see any missing assignments.
- The filter is way messed up. It blocks out things that reasly shouldnt be blocked but i know that that isnt up to you guys so ill talk about something that is. Not being able to use right click on the desktop is absolutely redonkulous and it makes everything i do on the computer slower and harder. Most kids cant even figure out how to copy and paste and i always have to tell them ctrl C then ctrl V because they only know how to do it with the right click. anyways i know that there is a way to fix these things and thats really all i have to say
- There is not a way to access our documents from home.
- All the computers are so slow that I want to kick them!
- Some of the blocks are really annoying. When I'm trying to do research, sometimes I can't get to a website that would give me the best opinion, such as forums. If I need a biased opinion, I like to read forums about something or other. This problem is greatest during government, when we do debates.
- Helpful websites are often filtered because they contain forums, also right-click needs to be replaced
- The computers need to be faster and maybe a little more of them besides the library.
- Go Huskies! Standford is going down!
- implemented to much safe computing
- The safe computing practices are too safe. Many websites are blocked which have valuable information and can cause complications for projects! Stop blocking so much we aren't in second grade, we are in high school.
- I feel like some of the websites should be avaible to students that have resources for classes.
- They need to tone down the site blockers cant go to half the sites we used to be able to view.
- the internet at school blocks to many things
- [REDACTED]

- Some websites that are blocked at the Enumclaw High School should not be blocked. some are used for projects and its hard to finish when you have to do other things at home to complete them. some websites should be blocked though. its all about finding a happy medium.
- the computer restriction is over board when i go to research some topics.
- this was too easy
- a little to much on #8 i beleive they block alot of things that are useful
- too many things blocked
- why do they have every other website blocked? some arent even bad. unblock them, its ridiculous, how are we supposed to learn and try to look up something if the page is blocked. i think were mature enough to handle it. thanks.
- Need to have teachers put homework or class work online so it is easier for students partents and teachers to help the student learn to the hightest degree. Also the high school calander is hrd to get to or find.
- I think that the district can further the learning of students with evan better technology. because we as students have very little resorces in technology and it should be improved.
- need to have information on sinor project online so we know what we are supose to be doing
- I believe the school can do more to protect students using safe computing practices with students. There are many ways to do this. One way would be to block media messaging websites such as myspace. Such sites as myspace take away from the learning curriculum and cause distractions ultimately leading to a weakening int he education system and less educated children in our country. This can cause the United States to fall behind the other countries in technological advances because we do not have enough people attending colleges and such because their grades did not reflect how much they learned because they did not learn that much in the first place because they were distracted during schooling time.
- computers are
coo
oo
oo!
- i can't ever find anything on the school's website.
- abcdefghijklmnopqrstuvwxyz now i know my abc's next time won't you sing with me :)
- im tired of taking this survey.
- we always take this survey
- block too many websites some are needed like Wikipedia a very usefull dictionary website is blocked.

-
- :)
 - Unlock Craigs list. thug life
 - sweet dude
 - Mac's rock need more it the school. PC's are not good that are bad!
 - Unlock Craigs list. thug life. tupac lives
 - call the cops if you see tupac
 - i belive the distric for more better teaching they should implament wifi internet connections in all class rooms
 - They took my right click!!!!!!!!!!!!!!!
 - we need to be updated hardcore.our website is ghetto!
 - we need to be updated hardcore.our website is ghetto!
 - i belive that we should block less web sites to the students so we can still work at school on projects.
 - i believe that our school could use a little more technology. and not block as many websites as we do now.
 - i dont think we should block as many websites. i dont know what else to say.
 - Blocking web info is not right. I should be able to see what an learn what i want as an individual. The distrect web does not get used also.
 - You should allow students to use their own personal emails, like when they need to email their project to a teacher or back home or somewhere convenient. Set up an email system like the staff do, but apply filters of different security. Allow students to go on off-school websites, like to go on myspace. Or facebook. Thank you for listening to my statement.
 - this survey was awsome
 - i <3 this school
 - i think our community and or learning environment is great!
 - nothing
 - 
 - I don't believe that technology should be so soley relied upon by students, the paper and pen are more fool proof than any computer. It's also unfair to students who do not own a computer at home and who are tied down to other homework and work, that they are forced to take time out of their schedule (possibly lowering their grades and performance in the work place/classroom) so they can create a brochure or visual

- Email sites should be allowed so I can electronically send assignments to school. email is confused with instant messageing which is blocked
- [REDACTED]
- i love school
- this was pointless.
- i love school
- I love school!
- the technology needs to be updated in the highschool
- this is nice
