

Dear Enumclaw High graduate,

I am working with Enumclaw School District Superintendent Mike Nelson on a project to feature Enumclaw High School graduates through a series we are currently calling: "Making the MOST of Education." Its purpose is to highlight Enumclaw graduates who have used their Enumclaw education as a springboard to further education and success. It is our hope these brief interviews inspire current students.

If you are willing to participate, please find attached the standard form we will be using for these features. We would also ask for a high-quality photo, preferably of you at your profession, but any reasonable photo would be acceptable. If you have siblings who are also willing to participate, a photo together would also be suitable. In responding, you give the school district permission to use the information and photo you provide in its intended purpose.

Thank you for accepting the challenge as we get this feature off the ground. We hope to highlight participants through our website and other media outlets if available.

Contact information for this project is listed below if you have questions. Please feel free to pass this information along to other Enumclaw High graduates who would like to participate.

On behalf of the Enumclaw School District, thank you again for helping us in this endeavor.

Sincerely,

Brenda Sexton
